PROFESSIONAL SUMMARY

Enthusiastic Computer Science (AI & ML) undergraduate with hands-on experience building practical machine learning and computer-vision applications, strong DSA fundamentals, and working knowledge of full-stack development. Comfortable translating real-world problems into data-driven solutions in C, Java, and Python. Seeking a Software Developer, Frontend Developer, ML/AI Engineer, or other technology role aligned with my academic background, where I can contribute and keep growing.

EDUCATION

- B.Tech in Computer Science (AI & ML), AKTU — 2026 • CGPA: 7.81
- 12th (CBSE) — 2022 • 80.7%
- 10th (CBSE) — 2020 • 77%

TECHNICAL SKILLS

Languages: C, C++, Java, Python

Web & Database: HTML, CSS, JavaScript, SQL, MongoDB

ML/AI & Frameworks: Scikit-learn, TensorFlow, MediaPipe, Flask, Streamlit, Pandas, NumPy

Tools & Platforms: Git, VS Code, Claude, ChatGPT

Problem Solving: 170+ DSA problems solved on LeetCode

PROJECTS

ClassSenseAI — Face Recognition & Attentiveness Monitoring for E-Classrooms

Problem: Instructors in online classes have no reliable way to tell when students disengage, making it hard to intervene in time.

Solution: Built a Flask-based system that detects faces via MediaPipe FaceLandmarker, estimates head pose to flag attentiveness, and classifies emotion in real time using an MTCNN + mini-Xception CNN, giving instructors a live dashboard of presence, attention, and engagement.

Tech Stack: Python, Flask, MediaPipe, TensorFlow (FER), HTML/CSS/JS

github.com/Mohitkumarvarshney/ClassSenseAI--face-recognition-in-E-classrooms

Multiple Disease Prediction System

Problem: Early diagnosis across multiple diseases is often delayed because screening for each condition typically requires separate, specialized checks.

Solution: Built a Streamlit web app that predicts Diabetes, Heart Disease, and Parkinson's from clinical/diagnostic inputs, using Random Forest classifiers for diabetes and heart disease and an SVM for Parkinson's, with each prediction returning a confidence score.

Tech Stack: Python, Scikit-learn, Streamlit, Pandas, NumPy

CERTIFICATIONS

- AI & ML Pro+ Certificate cum Internship — YBI Foundation (Sep 2023)
- One Month Live AI & Data Skills Certificate cum Internship — YBI Foundation (Credential ID: A9AYNKMRZMCG0)
